Bharadwaj Pasumarthi
bharadwajsaipasumarthi@gmail.com || 9182243816

Summary:

Working as **Azure Infrastructure Engineer** with **5 years** of experience in designing, deploying, and supporting Microsoft Azure infrastructure across enterprise environments. Hands-on expertise in Azure **Virtual Machines, App Services, Storage Accounts, Azure Networking** (VNets, NSGs, Load Balancers, VPN, ExpressRoute), Microsoft Entra ID (Azure AD), RBAC, Azure Monitor, Log Analytics, Application Insights. Experienced in Infrastructure as Code using Terraform and PowerShell automation, with exposure to Azure DevOps CI/CD pipelines. Strong troubleshooting, **cloud operations, performance optimization**, security, and governance experience.

Skills:

- **Networking**: Virtual Networks, VNet Peering's, NSGs, UDRs, VNet Gateway, Point-to-Site & Site-to-Site VPN, ExpressRoute.
- **Security**: Azure Firewall, Web Application Firewall (WAF), DDOS Protection plan, Azure DNS, Private Link & Endpoints.
- **Traffic & Delivery**: Azure Front Door, CDN, Traffic Manager, Application Gateway.
- **Compute & Migration**: Virtual Machines (VMs), Azure Migrate, Azure Site Recovery, Azure Backup, Azure virtual desktops and host pools.
- **Web & Storage**: App Services (Web Apps), Storage Accounts, Managed Disks, Files and Blob.
- **Identity & Access Management**: MS Entra ID, RBAC, Azure Policy.
- **Scripting & Tools**: PowerShell, Terraform.

Experience:

Value momentum Software Services PVT LTD **Dec 2025-Currently**

- Managed Azure infrastructure resources including Azure Virtual Machines, App Services, Storage Accounts, Azure Load Balancers, Virtual Networks, and Network Security Groups across Production Environments.
- Provisioned and maintained Azure resources using Terraform and PowerShell to standardize deployments and improve infrastructure consistency
- Supported Azure networking services including VNets, NSGs, UDRs, Private Endpoints, VPN Gateway, ExpressRoute, and DNS configurations.
- Configured Azure Monitor, Log Analytics Workspace, Application Insights, diagnostic settings, alerts, and dashboards for proactive monitoring.

- Managed Microsoft Entra ID users, groups, Managed Identities, and RBAC assignments following least-privilege access principles.
- Collaborated with development teams to support Azure DevOps CI/CD deployments and infrastructure automation using Terraform.
- Performed incident troubleshooting, root cause analysis, performance tuning, capacity planning, and production issue resolution.
- Created operational documentation, SOPs, deployment procedures, and cloud governance documentation.

Cloud4C Private limited: **Feb 2025-Dec 2025**

- Architected end-to-end Azure solutions aligned with customer business and technical requirements, ensuring scalability, reliability, and security for at most 50+ fortune clients.
- Architected and implemented end-to-end Azure infrastructure solutions based on customer business and technical requirements, ensuring high availability, scalability, security, and performance for 50+ enterprise clients.
- Conducted Azure Well-Architected Framework Reviews, identifying opportunities for workload optimization, security improvements, operational excellence, reliability, performance efficiency, and cost optimization.
- Designed, deployed, and managed Azure infrastructure services including Azure Virtual Machines, App Services, Storage Accounts, Virtual Networks (VNets), Network Security Groups (NSGs), User Defined Routes (UDRs), Azure Load Balancer, and Private Endpoints.
- Provisioned and managed Azure infrastructure using Terraform and PowerShell to automate resource deployments, standardize configurations, and improve operational efficiency.
- Implemented cost optimization strategies by leveraging Azure Reserved Instances, autoscaling, resource rightsizing, and storage lifecycle management, reducing overall cloud infrastructure costs.
- Configured and managed Azure networking components including VNets, VPN Gateway (Site-to-Site and Point-to-Site), ExpressRoute, Azure DNS, Application Gateway, and Private Link for secure hybrid connectivity.
- Configured Azure security services including Microsoft Entra ID (Azure AD), Role-Based Access Control (RBAC), Azure Firewall, Azure DDoS Protection, Web Application Firewall (WAF), Azure Policy, and Private Endpoints to strengthen cloud security and governance.
- Configured Azure Monitor, Log Analytics Workspace, Application Insights, diagnostic settings, alerts, and dashboards to proactively monitor infrastructure health and application performance.
- Collaborated with development and operations teams to support Azure DevOps CI/CD pipelines, infrastructure automation, production deployments, and release activities.
- Performed root cause analysis (RCA), troubleshooting, performance tuning, patch management, and infrastructure maintenance to ensure maximum service availability.
- Created technical documentation, architecture diagrams, deployment procedures, and operational runbooks aligned with Azure best practices and governance standards.

LTI Mindtree (Client: Microsoft) **Jan 2022-Jan 2025**

- Provided Azure infrastructure support for Microsoft Clients, By resolving complex cloud infrastructure issues for 50+ global enterprise customers while maintaining high service availability and customer satisfaction.
- Configured, deployed, and troubleshot Azure infrastructure services including Azure Virtual Machines, App Services, Azure CDN, Azure Front Door, Application Gateway, Azure DNS, Storage Accounts, and Azure Virtual Networks (VNets).
- Supported Azure networking components including VNets, VNet Peering, Network Security Groups (NSGs), User Defined Routes (UDRs), Azure Load Balancer, Private Endpoints, VPN Gateway (Point-to-Site and Site-to-Site), and ExpressRoute to ensure secure and reliable connectivity.
- Diagnosed and resolved Azure platform incidents using Azure Monitor, Log Analytics, Application Insights, Activity Logs, and diagnostic logs, minimizing downtime through effective root cause analysis.
- Managed Microsoft Entra ID (Azure AD), Role-Based Access Control (RBAC), authentication, and identity-related issues while implementing security best practices.
- Configured and supported Azure security services including Azure Firewall, Web Application Firewall (WAF), Azure DDoS Protection, Private Link, and Private Endpoints to strengthen cloud security.
- Managed SSL/TLS certificates, Azure Key Vault integration, custom domain configurations, certificate renewals, and TLS version compliance for Azure workloads.
- Supported hybrid connectivity solutions by troubleshooting VPN Gateway, ExpressRoute, and App Service VNet Integration issues between on-premises and Azure environments.

Education:

- Bachelor Of Technology (ECE) from Sai Spurthi Institute of Technology, B.Gangaram. Affiliated to JNTUH (2017-21).

Certifications:

- **Microsoft Certified:** Az Administrator (Az-104), Az Fundamentals (Az-900).
- **Google Certified:** Associate Cloud Engineer && Professional Cloud Architect.

Achievements:

- Appreciated with Best employee award for the Quarters of September and January.
- Awarded with best team player award in the previous month.
- Awarded with best employee Award from SDM in October
